

Ryan Stack Project Coordinator

Education:

State University of New York, SUNY Orange
Associate of Applied Science in Architectural Technology

Experience:

While working toward his degree in Architectural Technology, Mr. Stack joined RRA Designs in 2021 and has since been a key part of the firms' day-to-day operations. Since starting with RRA Designs, Ryan's passion for the food service industry has continued to grow with every project designed, engineered and completed. While working and growing in the food service industry, Ryan has received his Associate Degree in Applied Science with a concentration in Architectural Technology from SUNY Orange. With this training/ education, he has expanded his responsibilities within the company and is currently Project Coordinator.

Working mainly as a draftsman when he started, Ryan has transitioned to his current role seamlessly. He continues to learn and gain the experience needed to fill this role and has further expanded his responsibilities and management with a more extensive workload. Mr. Stack is constantly collaborating with our end-user clients, as well as our architects and engineering clientele to successfully work towards project goals.

Currently, Ryan is involved in all sectors of food service design, including K thru 12, Higher Education, Healthcare, Corporate and Restaurants. Working closely with the firms Principal, Ryan is involved in both front of the house and back of the house applications. Ryan's responsibilities and duties consist of creating full design/ construction drawings which include equipment layout plans, equipment utility schedules, point of connection rough-in drawings, equipment cut data booklets, integration of engineered systems, custom fabrication details, sections and elevations, as well as 3-D/ BIM modeling and coordination.

With his passion ignited for the food service industry, Ryan has recently joined the Foodservice Consultants Society International (FCSI). Ryan is currently an Associate Member of FCSI, diligently fulfilling the necessary requirements and continued education units to one day become a Professional Member.
