RESUME

Brett J. Farrell President

Education:

State University of New York at Buffalo
School of Architecture & Planning
Bachelor of Science in Architecture
Graduated Cum Laude– 2002

Experience:

Upon graduating from State University of New York at Buffalo School of Architecture & Planning, Mr. Farrell worked for Spence Engineering, an innovator in steam specialty and fluid control devices, located in Walden, NY, as a draftsman. Mr. Farrell worked for the engineering company to gain the drafting experience necessary to enter the field of architectural design. In an effort to return to his background in architecture, Mr. Farrell joined the team at Raymond/Raymond Associates (RRA) in November 2002.

Since joining RRA, Mr. Farrell has worked as Project Manager for various educational, healthcare and corporate food service projects. His responsibilities at RRA include schematic design, design development, construction documents, 11 40 00 section specifications and construction administration. In addition, he is responsible for programming, code compliance and assisting in the design of food services engineered systems.

In 2009, Mr. Farrell was appointed Associate at RRA, which further expanded his responsibilities and knowledge within the firm and its industry. In the years to follow, Mr. Farrell expanded on RRA's attention to detail, implementing methods to produce more stringent design documents and standards, ultimately furthering his role in the firm to Principal in April 2012.

As of August 2014, Mr. Farrell became President at Raymond/ Raymond Associates, assuming full operations from R. Joseph Raymond, an industry veteran for more than 50 years. He is currently a Professional Member of the Foodservice Consultants Society International (FCSI), which is affiliated with many major national organizations. FCSI sets the guidelines, ethics and criteria for design excellence in the food service industry.
